

## Features & Benefits

Who has the time to repeatedly apply a spray? How about stopping your busy work schedule to remove your glasses and wipe the lenses? And what about doing any of this while driving or trying to read street signs and addresses during a delivery? Nobody likes fumbling with their glasses, especially when people are depending on you.

When you need to get things done, Shamir **Glacier™** Anti-Fog with **Duplex Technology** takes care of all that, and more.

### AR Coating

All the benefits of an Anti-Reflective coating on the front to **reduce, resist, repel** various elements.

### Permanent

No initial spray or cloth activator or re-activation needed.

### Fog-Free

Permanent fog-free technology built in the back-side of lens.

### Clearer Vision

Collects and spreads water vapor on lens in a pattern that preserves the vision clarity.

## Your Vision Matters and not just to you

Although initially developed for athletes, Shamir **Glacier™** Anti-Fog with **Duplex Technology** has been adapted to protect and aid everyone during these trying times. While essential for frontline workers, masks are becoming more commonplace for everyone, regardless of industry. Not only do health care professionals need them, but now so do cashiers, food workers, and anyone else who needs to protect themselves and others at work, like rideshare providers. In addition, anyone who does strenuous activity or works in high humidity environments needs clear lenses.

Fogging is not an option when you have a job to do and people depend on you. Whether they are your patients, colleagues, students, family or friends, they need you to be at the top of your game. Shamir **Glacier™** Anti-Fog is your best bet at being there. Don't let fogging prevent you from achieving perfect vision.

Talk to your eye care provider today and ask for it by name.

## Shamir **Glacier™** Anti-Fog

An innovative lens coating that  
**prevents fog-up** and **promotes focus.**

# Why Shamir **Glacier™** Anti-Fog?

Shamir **Glacier™** Anti-Fog has **Duplex Technology**, with the benefits of both an **anti-reflective coating** on the front side of the lens, and a **permanent anti-fog coating** on the backside of the lens, to provide relief against fog build up without a need for a spray or cloth activator or re-activator.

**Duplex Technology** has your lenses covered permanently, front and back.

Shamir **Glacier™** Anti-Fog:

- Doctors
- Nurses
- EMTs
- Police officers
- Ambulance drivers
- Cashiers
- Restaurant workers
- Professions where safety glasses are required and anyone else who regularly experiences glasses fogging due to
- Sports or exercise, indoors and out
- Work that involves strenuous activity

## The Fog Stops Here

Today, when wearing a mask is essential, so is crystal clear vision.

Everyone from doctors and EMTs to cashiers and crossing guards, rely on their vision to remain clear. But wearing a mask every day, especially for long hours, can cause lenses to fog up, creating an uncomfortable and sometimes dangerous situation.

That's where Shamir **Glacier™** Anti-Fog lens coating comes in...

## Why do Lenses Fog?

Lenses fog up when warm and humid air comes into contact with the cooler back side of your lens. The humidity then condenses as tiny water droplets that cover the back of the lens.

This happens during natural breathing with masks and glasses, and during strenuous activity. Increasingly it happens to essential workers who need to wear masks and shields.

Shamir **Glacier™** Anti-Fog stops it.
